

# Michael Vaganov ( [michael.vaganov@gmail.com](mailto:michael.vaganov@gmail.com) )

---

## Summary

Senior level software developer with game programming, teaching and technical mentoring background. 8+ years of teaching undergraduate game development in C++, in technical and practical 8-week courses, and guiding final projects (rapid prototyping with interns). 4+ years teaching CS K-12, primarily High School. 5+ years Teaching Unity 3D game/VR development. 2+ years technical management at small companies. Professionally implemented Unity prototypes, garbage-collection systems in C++, socket networking code, domain specific scripting languages, and a domain-specific web-browser on pre-smart-phone mobile.

## Skills

---

- **20+ years Programming:** hobbyist, game programmer, educator, consultant, software engineer
- Programming Languages: **C, C++, C#, Java, JavaScript, Python**
- Software Domains: games, productivity, automation, UI/UX, client/server, 3D, AR/VR, Web, ANN
- **15+ years Teaching Computer Science:** ages 7 to 40+, as tutor, undergrad professor, high-school teacher, code coach

## Portfolio

---

- Code Samples: <https://github.com/mvaganov/>
- Personal Website: <http://www.codegiraffe.com/portfolio/>

## Employment History

---

### Senior Software Engineer at Moback

*(Apr. 2020 to present)* Member of a mercenary guild of elite robotics/VR/AR developers

- Developed Augmented Reality (AR) software prototypes using C#, C, C++, and Python
- Developed realtime simulation serving data to varied software and hardware clients using sockets
- Wrote Teensy (Arduino-related) micro controller code for novel prototype hardware
- Managed tasks, mentored and worked with junior engineers, found key hires, vetted new hires in technical interviews
- Collaborated with fortune 500 company client to design science-fiction-like augmented reality tools

### Director of Engineering at Lightside Games

*(Jun. 2019 to Apr. 2020)* Ranking software developer at a distributed mobile games studio

- Developed proof-of-concept software prototypes with Unity
- Planned [engineering culture and advancement track for engineers](#), including [review process](#)
- Vetted external contractors responsible for bulk game development
- Collaborated with lead designer to plan product pipeline, including concept market-testing
- Represented company at conferences and industry meetups

### Chief Educator, Futurist, and Code Coach at Applied Computing Foundation

*(Feb. 2020 to present)* Showing how to Apply Computing to solve problems (I'm making wizards!)

- Part of executive committee, giving feedback on process and guidance on future initiatives
- Teaching Virtual Reality, Game Development, and Entrepreneurship classes

## Faculty at Gamebridge Unityversity

(Aug. 2016 to Mar. 2020) Lead weekly Virtual Reality & Game Development workshops

- Responsible for Unityversity's Santa Clara Central Park Library classes in Santa Clara, CA (2019)
- Improvisational tutorials about: programming, game design, software development, math, 3D modelling, digital art, other tech.
- Taught throughout the California Bay Area (USA), and Seoul (South Korea, Nov 2019)

## Computer Science Teacher at Sacred Heart Prep

(Aug. 2015 to Jun. 2019) Faculty member at an exclusive private school.

- Taught computer science, with curriculum designed to motivate with creativity and computer hacking
- Subjects: Computer Science fundamentals, HTML/CSS, Python, JavaScript, C, C++, C#, Unity, VR, computer graphics, photoshop, 3D modeling, 3D printing, electronics, cyber security, tech industry culture
- Wrote software used to notify complex class schedule using speech synthesis using speech synthesis
- Wrote Artificial Neural Network from scratch using Python, then again C#, as a learning exercise

## Code Coach at theCoderSchool

(Sep. 2014 to Aug. 2015) Elite Computer Science education for youth (between age 7 and 17) in the Silicon Valley.

- Custom-built tutorials for: Unity, C#, C and C++, Java, Blender, 2D/3D math, Game Design, Project Management

## Self Employed Programmer, Entrepreneur

(Dec. 2012 to Present) Personal moonshot, and consulting services including prototyping and technical planning.

## Professor at DeVry University (Silicon Valley Campuses)

(Mar. 2006 to Dec. 2014) Professor of Games and Simulation Programming (GSP), a Computer-Science-like Bachelors of Science degree program, with emphasis on game development.

- Rated highly in students evaluations (consistently 3.5+ out of 4), despite having [difficult classes](#)
- Focused on teaching performant code and game development in C and C++
- Taught and evolved course content: programming, data structures, practical software architecture, computer graphics, AI for games (expert systems), project management, design
- Managed 30+ Senior Project teams (16 week projects, 2 to 5 programmers /team with varying skill levels)

## Software Engineer at Limelife

(Nov. 2006 to Apr. 2008) Developer responsible for end-to-end network-aware flip-phone mobile application development.

- Senior-level engineer: product development, build-systems and automation, client/server
- Fully automated heavily manual build process requiring test-activity to seed meta-data, saving hours-per-day for build engineers
- Created DRM (Digital Rights Management) abstraction layer, implementing client and server side code
- Implemented garbage-collection and a domain-specific web-browser for "ALE", a (quite impressive) wide-porting/localization/multi-platform, multi-lingual (C++ and J2ME) API and build system. Created for flip-phones, ALE's build system could notably compile a J2ME program into BREW C++ for any target device known by the system.
- A responsible part of shipping 5 distinct mobile titles, and many SKUs of each

## Software Engineer at Infospace Mobile Games

(Dec. 2004 to Nov. 2006) Developer of mobile applications with emphasis on client/server interaction.

- Senior-level engineer: product development, framework, R&D, client/server
- Implemented and debugged multiple proprietary asynchronous client/server products

- Conceived and implemented original scriptable UI engines for mobile and created associated compilers and virtual machines
- Lead development of a social-media photo-blogging application
- Created a client/server test app used for system testing and engineer training
- A responsible part of shipping 5 distinct mobile applications, and many SKUs of each

#### **Porting Engineer at Atlas Mobile (later purchased by Infospace)**

*(Jun. 2004 to Dec 2004)* Very productive first-6-months-of-professional-software-development.

- Client side QA developer, primarily tasked with porting and bug fixing
- Identified as a 'BREW expert' by technical management, 6 months after learning BREW
- A responsible part of shipping 5 "For Prizes" mobile titles, and 30+ SKUs of each

## **Education**

---

#### **Keller Graduate School of Management**

*(Sep. 2006 to 2010)* Masters of Project Management

#### **DeVry University**

*(Jul. 2001 to Oct. 2004)* BS of Computer Information Systems

## **Other**

---

#### **Volunteering**

- Computer Science Teachers Association, Silicon Valley CSTA chapter (Member: Jan. 2017 to present, President: Jan. 2018 to Sep. 2019)
- FIRST Robotics, FTA (Field Technical Advisor) certified (Jan. 2020)
- Citizen Schools: public school outreach (Feb. to Apr. 2014, Oct. & Nov 2013)
- Coder Dojo Silicon Valley: conference-style tech meetups for kids (Sep. 2013 to 2017)
- Guest Lecturer at various universities in Uganda (Oct. & Nov. 2012)

#### **Hobbies**

- Hiking, Biking, Rock Climbing, Fencing
- Software Side-projects, Game Jams and Hackathons
